

Sewage Treatment

Screw Press Dehydrator

Compact and stable dehydration

Kobelco Eco-Solutions provides compact press-in cylinder rotation screw press dehydrator for stable dehydration.

Features

- Energy saving type with reduced energy consumption
- Affordable equipment cost and running cost
- Light, simple and easy-to-manage structure
- Noise- and vibration-free rotation at low rate
- Operable with polymer fluid only without filter cloth
- Easy odor control by sealed structure
- Low returned water load with less washing water amount
- Adjustable cake moisture content and treatment capacity

Applications

- Active excess sludge treatment
- Mixed sludge (coagulation + active) treatment
- City water and sewage treatment
- Excrement and sludge treatment
